Department of Senior Programs and Services

From the County Executive

Westchester County's Directory of Services, Rights and Benefits offers a range of programs to all senior citizens living in the County. We have compiled this directory to help outline valuable and practical information on everything from Adult Daycare Centers, to the Widowed-to-Widowed Network.

Enjoy browsing through it. I'm sure you'll find new details about topics and places you may already be familiar with, and probably some new ones as well.

WESTCHESTER COUNTY DEPARTMENT OF SENIOR PROGRAMS AND SERVICES

Who We Are

The Older Americans Act of 1965 created networks at the federal, state and local levels to administer programs that help the elderly maintain their health and independence in their homes and communities.

The Westchester County Department of Senior Programs and Services is part of this National Network on Aging. It includes the Administration on Aging in the U.S. Department of Health and Human Services, 57 State Agencies on Aging, 670 Area Agencies on Aging and some 27,000 local service provider organizations under contract to the area agencies.

In 1974, the Westchester County Office for the Aging was designated by the New York State Office for the Aging as the Area Agency on Aging to serve all persons 60 years of age and older in Westchester. In March 2002, the Westchester County Office for the Aging became the Westchester County Department of Senior Programs and Services.

Our Mission

Our mission is to identify and prioritize the needs of the elderly in Westchester; to create comprehensive and coordinated plans to meet those needs; and, to advocate for responsive policies, programs, actions, legislation and resources on behalf of the elderly.

The Westchester County Department of Senior Programs and Services conducts activities and develops programs and services, to meet the intent of the federal Older Americans Act and the New York State Community Services for the Elderly Act. The goals and missions of both acts are to enhance the quality of life for the elderly by encouraging:

- ***Sufficient income to meet basic needs***
- ***The best physical and mental health possible***
- ***Appropriate housing according to individual needs and wishes***
- ***Services to restore health to the best possible state***
- ***Employment opportunities***
- ***Dignified, honorable and healthful retirement***
- ***Freedom to pursue meaningful activities***
- ***Adequate community services***
- ***Benefits from social and medical research as soon as possible***
- ***Initiative, freedom and independence to manage and plan their own lives***

A primary role of the Westchester County Department of Senior Programs and Services is to maintain a complete inventory of services available to older persons and to serve as an **information and referral point for local services.**

A WEALTH OF SERVICES

This booklet has been prepared by the Westchester County Department of Senior Programs and Services to acquaint you with the wealth of services and benefits available to you as a senior citizen in Westchester. They are listed alphabetically to make it easier to find what you need. Services are also listed by community in the appendix. We hope that you will find this “person-to-person” directory useful.

Livable Communities: A Vision for All Ages Initiative – Title

The goal of the Livable Communities: A Vision for All Ages, is to keep people in their homes and their communities as they grow older with independence and dignity. The initiative works through the grassroots Livable Communities Connections (LCCs). The Livable Communities Villages and the Livable Communities Collaborative.

The LCCs were established to provide local and focused support education and advocacy. We are diverse in many ways that makes it essential to avoid a uniform approach to local programming. The LCCs provide information about unique regional and local priorities and are able to implement programming that is most relevant to the immediate geographical area. There are six regional LCCs responding and taking action on all aspects of aging.

The Livable Communities Village Approach is another grassroots component of the initiative. Ultimately through the villages, members are given education and tools so that they can take a neighbor-to-neighbor approach to looking out for one another and so that they can have a choice in sharing local policies and priorities. Currently, there are 304 villages comprised of over 250,000 members.

The Livable Communities

Collaborative included 18 groups composed of organization and seniors with an interest in serving the needs of older people and their caregivers.

The goals of LC Collaborative are to: (1) improve coordination of services (2) reduce duplication and fragmentation of services (3) share information and resources to fulfill common group needs, such as training and community education forums and (4) included a wider variety of organizations in the network to serve seniors. The LC Collaborative meets regularly throughout the year to organize and implement services and advocate for issues important to their area of focus.

Telehealth Intervention Programs for Seniors (TIPS)

Electronic information and communication technologies to provide and support health benefits to increase quality of care, expand healthcare access, and reduce healthcare costs.

TIPS combines three key elements to help seniors age successfully:

- First – clinical monitoring of vital signs, including blood pressure, pulse, oxygen levels and weight.
- Second – a complete social check-up to make sure seniors are aware of all the services and programs available – whether it be housing, transportation, caregiving or any of our other support programs.
- Third – hands-on, Intergenerational support from a network of volunteers, including student technicians and nurses from various colleges and universities.

TIPS participants have their vital signs – blood pressure, pulse, blood oxygen levels and weight – checked

twice a week by a trained technician. The data is transmitted to a nurse who reviews it remotely and sends messages back to be reviewed at the next session. If there is cause for immediate concern, the nurse may contact the patient, caregiver, primary care physician or on-site administrator directly.

Participants leave each session with a “TIPS Sheet” that includes their vital signs, an explanation of what the results mean, and any relevant referrals. This information can help seniors self- manage their own health and be proactive if they see any negative changes. Telehealth solutions are not intended for emergency use or real- time monitoring of patient vital signs.
